Agenda Items	Overview / Action Items	Responsible Party	Timeline
Discussion: Approval of 3/08/2021 meeting minutes	Action Items: Revisited March 2021 minutes	Mobley	
	Motion: Group review for any modifications		
	Committee Decision: March 2021 minutes approved		
Discussion: T&P Guideline Revision	Action Items: -Non-tenure track is ambiguous and needs the most work. The document that we have now for non-tenure track faculty needs to cover promotion transition process more clearly. -Clinical track vs research vs lecture track needs to be clearly defined and separated. - Consider adopting the single-mission, multi-mission non-tenure track faculty system utilized by other UF health professions colleges.	Mobley/Frye	

	<ul style="list-style-type: none"> - Consider requiring education portfolios for faculty who have significant teaching responsibilities and clinical portfolios for faculty who have significant clinical responsibilities. This would be consistent with other UF health professions colleges. - Admin service distinction needs work. - Achievement of national reputation is NOT required for faculty in single mission and multi-mission for other colleges, which deviates from COP. Need to look into this. 		
	<p>Committee Decision:</p> <ul style="list-style-type: none"> - Adopt the single-mission, multi-mission faculty track system for non-tenure track faculty. Outline assignment percentages in single and multi-mission category, start with clinical vs research then branch out into single and multiple missions. Look at other guidelines to see how they're organized. Keep as one document containing both tenure and non-tenure track. – Frye, Frazier, and Mobley will create an outline delineating the different tracks with a goal of improving current guidelines so that it provides clear guidance to all stakeholders - Require an educational portfolio for faculty with significant teaching responsibility. The portfolio should be consistent with the Teacher of the Year portfolio, but will likely be briefer – Frye and Mobley will work on this - Decision not made regarding the requirement for a clinical portfolio for faculty who have a significant clinical responsibility. This will be revisited. - T&P revision subgroups will send reports of their work to Mobley
